

Transmission Portal - API Route Documentation

This document provides a comprehensive list of all API endpoints for the Transmission Portal, covering Rajasthan, Khavda, and the Chatbot Service.

BASE_URL = <https://transmission-api-v3.unada.in/>

1. Rajasthan API Endpoints (/api/rajasthan/)

#	Method	Path	Description
1	GET	/api/rajasthan/health	Health check
2	POST	/api/rajasthan/upload	Upload Excel/Image → 3-table parsing
3	GET	/api/rajasthan/default-data	Latest is_current snapshot
4	GET	/api/rajasthan/current-data	In-memory NETWORK_DATA
5	GET, POST	/api/rajasthan/reset-data	Clear in-memory data + pending edits
6	GET	/api/rajasthan/projects	List non-deleted projects
7	POST	/api/rajasthan/projects	Save current state as snapshot
8	GET	/api/rajasthan/projects/<id>	Load project into memory
9	PUT	/api/rajasthan/projects/<id>/update	Overwrite snapshot
10	DELETE	/api/rajasthan/projects/<id>	Soft-delete project
11	GET	/api/rajasthan/projects/<id>/export	Export as Excel
12	POST	/api/rajasthan/persist-edit	Apply single edge edit
13	POST	/api/rajasthan/update-edge	Update edge field
14	POST	/api/rajasthan/bulk-edit	Batch update; pipeline sync

2. Khavda API Endpoints (/api/khavda/)

#	Method	Path	Description
1	GET	/api/khavda/health	Health check
2	POST	/api/khavda/upload	Upload Excel → 4-table Khavda parsing
3	GET	/api/khavda/default-data	Latest Khavda snapshot
4	GET	/api/khavda/current-data	In-memory KHAVDA_NETWORK_DATA
5	GET, POST	/api/khavda/reset-data	Clear Khavda in-memory state
6	GET	/api/khavda/projects	List Khavda projects
7	POST	/api/khavda/projects	Save Khavda state to DB
8	GET	/api/khavda/projects/<id>	Load Khavda project
9	PUT	/api/khavda/projects/<id>/update	Overwrite Khavda snapshot
10	DELETE	/api/khavda/projects/<id>	Soft-delete Khavda project
11	GET	/api/khavda/projects/<id>/export	Export as Excel
12	POST	/api/khavda/persist-edit	Apply single Khavda edge edit
13	POST	/api/khavda/update-edge	Update Khavda edge field
14	POST	/api/khavda/bulk-edit	Batch update Khavda edges/nodes
15	GET	/api/khavda/hierarchy	Full KPS → PSS → Project → Phase

#	Method	Path	Description
			→ Block → Breakup tree
16	GET	/api/khavda/hierarchy/stats	Aggregate counts: KPS, PSS, Projects, Total GW
17	GET	/api/khavda/hierarchy/search	Filtered tree + autoExpand paths for query
18	GET	/api/khavda/hierarchy/kps	Flat list of KPS substations
19	GET	/api/khavda/hierarchy/kps/<kps>	Single KPS subtree
20	GET	/api/khavda/hierarchy/kps/<kps>/pss/<pss>	Single PSS subtree with connMwValues
21	GET	/api/khavda/hierarchy/projects/<id>	Hierarchy from a saved snapshot
22	GET	/api/khavda/hierarchy/projects/<id>/export	Export hierarchy as Excel
23	GET	/api/khavda/hierarchy/paths	All expandable paths (for Expand All)

3. Chatbot API Endpoints (/api/chatbot/)

#	Method	Path	Description
1	GET	/api/chatbot/	Chatbot HTML UI
2	POST	/api/chatbot/ask	NL2SQL question → LLM answer + SQL
